

## JUNGLE WALK USING 8 POINTS OF THE COMPASS

You are going on a walk through the Jungles of India to try and find the Man Village. On the way you will meet up with a lot of interesting creatures and animals! See how many of them you already know

First, draw a compass in the bottom right hand corner of your page. Include all 8 points of the compass that you have learnt correctly before carrying on with the directions.

Start on the square marked "START HERE"

Move 2 spaces SOUTH EAST-and which friendly creature do you see?  
From there, move 4 spaces SOUTH and tell me who you see that is ready to pounce? Now, move 5 spaces NORTH EAST and write down the name of the character chewing on the leaves.

Now for the next animals, be very careful as they can be very cheeky - move 4 spaces SOUTH and then 1 space SOUTH EAST- who do you see?  
Now we have quite a walk ahead of us as we go hiking to find the next character. Go 5 spaces SOUTH and then 2 spaces SOUTH EAST over the mountains.

After going 3 spaces SOUTH, who do you see calling the Pack to Council Rock for a meeting?

Now go 7 spaces WEST and 4 spaces NORTH WEST and who do you see?

To find the next character we have quite a way to go - 3 spaces SOUTH, 2 spaces SOUTH EAST, 4 spaces EAST, and 4 spaces SOUTH. You will come across a character that looks very fierce but he is actually quite friendly!  
Who is he?

We are now on the last bit of our journey - go 3 spaces WEST, 2 spaces SOUTH WEST and finally you will come to the Man Village!

Well done - you have made it through the jungle!
