

Flying

Category	Game
Type	Steam release
Time to allocate (mins)	10

First, briefly explain the forces involved in flying:

- Thrust : The engines push the airplane forward
- Drag : The resistance of the air which slows the plane down
- Gravity: The weight of the aircraft pulls it toward the ground
- Lift: Air flowing over the wings moves the aircraft upward

Instructions

Have the Cubs stand in a line facing the leader. The leader shouts out one of the four forces of flight. The Cubs must do the action for the force as follows:

- Thrust: Run forward
- Drag: Run backward
- Gravity: Fall down
- Lift: Jump
