

Match your pair

Category	Game
Type	Steam release
Time to allocate (mins)	5
Instructions	<p>This running activity is an interesting one as it combines quick-thinking, pattern identification, and matching in game. Two groups of Cubs can find their matching pair, if you provide the right prompt. You can say something like, “Find someone with the same hair color”, or “Find someone who likes the same colour”.</p> <p>You can have the kids run around in a large playground setting to find their matching pair. Once they're paired up enough times, you can talk about the power of diversity and how we're all similar despite being different.</p>
