

Tin Can Golf

Category	Game
Type	Wide game
Time to allocate (mins)	20

You can get the Cubs to make all the elements first and then play or make the items ahead of time and just play the game either as a team game or over a wide area.

For the holes:

Tin cans (as many as the holes you want for the game)

Ice cream stick

Flags (numbers on a triangle cutout)

Glue stick & scissors

Tape

For the club:

2 x paper towel rolls, plus a half cut lengthways to brace them together

1 piece of thick recycled cardboard (ideally a flap from a cardboard carton)

Duct tape

1. Make the club by cutting out a piece from the cardboard scrap as shown in the collage below for the bottom of the club, cover with duct tape and trim.
2. Stick the 2 paper towel rolls together with the duct tape using the half piece cut lengthways as a brace over the join. Cover the entire stick with duct tape to give it a bit more strength and also for aesthetic value.
3. Tape the cardboard "club" to the end

Instructions

For the obstacles:

Assorted cardboard boxes – e.g. cereal boxes, cracker boxes etc.
Duct Tape and scissors

Cut the boxes up and make them into different obstacles. For example cut the base and top out of the box to create a tunnel, or attach ramps and sides to create a bridge over the top of the box.

Now play golf

Make an 'X' out of duct tape as the starting point and the Cubs can take turns making their way through the course.
