

## Cities on Water

13 Sep 17:30

Duty six : Purple

Start	Time	Activity	Requirements	Instructions	Scouter
<b>Did you know that there are cities built on water like Venice? There is also a city built on a lake in Africa (in Benin) called Ganvie where all the houses are on stilts.</b>					
13 Sep 17:30	5	<b>Activities</b> : Opening	Register, beans, flag, totem and skin	Grand Howl Flag Break Register Inspection - belts and shoes	Akela
<b>Water is becoming more scarce due to climate change, pollution and more people on the planet. In this game, you need to stay in the water</b>					
13 Sep 17:35	10	<b>Game</b> : Disappearing Water		Have a long rope handy for this game. Use it to form a big circle. This will represent a body of water which is full. Cubs run around and when the whistle blows, they all need to get into the water. Those who do not fit into the circle are out of the game. Each time the Cubs run around, make the circle smaller and smaller until there are only two or three Cubs left.	Akela
13 Sep 17:45	5	<b>Activities</b> : Juice and biscuits		Juice and biscuit break	Akela
<b>Some possible quiet games for the younger Cubs while the WaterCAN presentation is being done</b>					
13 Sep 17:50	10	<b>Game</b> : Find the Water!		Cubs sit in a circle. One person is chosen to sit in the centre of the circle, blindfolded. The bell is passed round the circle. Cubs may not silence the bell by holding the clapper - they have to pass it carefully though so that it does not ring. The Cub in the centre should guess who is holding the bell and should point in the direction. He/she has three chances to discover who is holding the bell. If successful, he/she gets a point. A new player enters the centre after three tries.	Akela
13 Sep 18:00	15	<b>Activities</b> : Build a Bridge	popsicle sticks, elastic bands, lego bricks, straws, paper	Give the Cubs different materials to build a small bridge. You can give them specific challenges (e.g. must hold the weight of a can or some coins, must span a certain distance, must be a certain height). You can mix up the materials and give each group a different set of materials or they can select for themselves what they want to use. Alternatively, provide them all with the exact same items and make it a competition of sorts.  The Da Vinci bridge design is an option using sticks, staves or popsicle sticks to show a self-supporting bridge with nothing holding the sticks together.  <a href="#">HOW TO MAKE A DA VINCI BRIDGE // Full-size Leonardo Da Vinci bridge - YouTube</a>	Akela
13 Sep 18:15	10	<b>Activities</b> : Acid Rain Experiment	3 jars water white distilled vinegar OR lemon juice	Pollution is a problem in our world. We pollute the water and ground by littering paper, plastic, glass, and other garbage on	Akela

			3 single flowers (carnations, gerbera daisy, etc)	<p>the ground or into the water. Pouring chemicals such as motor oil and gas into water or runoff from weed killers used on our lawn make their way into our water and must be filtered. Factories, homes and cars pollute the air by burning coal, gas, and other chemicals. The smoke travels through the air and into the atmosphere where it gets trapped in the clouds with the moisture that naturally evaporates from the earth's surface. When clouds get full of water, they empty by raining (or snowing) bringing the pollution along ; this is called acid rain. Not all rain is acid rain. Acid rain is the rain that has a high ph level (acid level).</p> <p>So, what's the big deal – that's the Earth's way to filter and provide water, right? Well the problem is that when we produce too much pollution that rains down and becomes part of the water source for plants – the acid rain can harm plants (and animals in high enough concentrations). Normal rain has a PH of 5.6. At 4.3 acid rain starts to have harmful effects headaches, coughs, and throat irritations in humans. Fish will begin to die at a ph of 4.2. When people eat toxic plants and animals that have been contaminated with acid, they can have kidney problems, brain damage, and more.</p> <p>Acid rain experiments</p> <p>Start by labeling your 3 jars and adding the solution indicated:</p> <p>water (just water)</p> <p>little acid rain (1/4 cup vinegar OR lemon juice and the rest water)</p> <p>lot of acid rain (1 cup vinegar OR lemon juice and the rest water.</p> <p>Add a flower to each solution. Point out how all the flowers are healthy and look about the same.</p> <p>Observe the flowers. DO you notice a difference in the flowers. (24 hours later, share photos or can check on them the following week).</p>	
13 Sep 18:25	15	<b>Yarn</b> : How Fear Came to the Jungle		See attached	Akela
13 Sep 18:40	10	<b>Game</b> : Ship's Captain		<p>The captain calls out orders to the rest of the players who are the crew. If a Cub does not follow an order correctly, then they are out. This decision is made by the Captain who is always right! The game is played until only one Cub is left. Some command ideas:</p> <p><b>Port</b> - run to the right side of the boat</p> <p><b>Starboard</b> - run to the left of the boat</p> <p><b>Bow</b> - run to the front of the boat</p>	Akela

				<b>Stern - run to the back of the boat</b> <b>Hit the deck</b> - lay down on your stomach <b>Attention on deck</b> - salute and yell "Aye Aye Captain". Cubs must not move until the next command is given. <b>Sick turtle</b> - everyone lies on their backs with their feet and hands in the air <b>Shark</b> - everyone must run to a designated area and shout out SHARK! The last one there is out. <b>Three men in a boat</b> - the crew must form groups of three and sing "row, row the boat"	
13 Sep 18:50	5	<b>Activities</b> : Closing	Totem, Skin Badges, certificates	Announcements Badge handouts Grand Howl Flag Down Prayer Dismiss	Akela

Programme prepared on 08 May 22:28

How Fear Came to the Jungle

Category	Yarn
Time to allocate (mins)	15
Story	<p>From the Jungle Book</p> <p>The Law of the Jungle - which is by far the oldest law in the world - has arranged for almost every kind of accident that may befall the jungle-people; till now its code is as perfect as time and custom can make it.</p> <p>Mowgli spent a large part of his life with the Seeonee Wolf Pack. He learnt the law from Baloo the Bear. It was Baloo who said that the Law was like the giant creeper because it dropped across everyone's back and no one could escape it.</p> <p>This story all began when the winter rains failed to come to the jungle. Ikki, the porcupine, met Mowgli in the bamboo thicket and told him that the wild yams had dried up. Mowgli laughed and said: "What is that to me?" Ikki said: "Not much now, but you do not dive in the deep rock pool near the rocks anymore."</p> <p>Spring arrived, but no rain - drought had come to the jungle. Slowly the heat crept into the Jungle, turning it yellow and then brown and lastly black. The birds and the Monkey-people went north and the deer and wild pigs went into the fields of the villages. Chil the Kite stayed and grew fat for there was a great deal of carrion. He brought news that the sun was killing the jungle for three days flight in every direction.</p> <p>Mowgli had to fall back on stale honey and grubs in the bark of trees. The heat went on and on sucking up all the moisture and soon a long lean blue ridge of rock showed in the centre of the stream.</p> <p>Hathi, the Elephant, declared the Water Truce for it was the Peace Rock that was showing. By the Law of the Jungle it is death to kill at the drinking places when the Water Truce is declared. For so great is the common need for water that everyone must "play the game."</p> <p>Bagheera was Mowgli's adviser in this time of trouble and one evening he and Mowgli came down to the pool. On one bank were the deer, pigs and wild buffalo and on the opposite bank the eaters of flesh - the tiger, wolves, panther and the bear.</p> <p>Hathi and his sons were the guardians of the Truce. Mowgli asked him if he had ever seen a drought like this before. Hathi's only answer was "It will pass". There was talk up and down the banks but all the news was bad.</p> <p>Shere Khan, the lame tiger, limped down to the water and as he dipped his chin and jowl in the water, dark oily streaks floated from it down-stream. He had fouled the water by coming straight from killing a Man. Shere Khan said it was his right and his night and "I killed for choice - not for food".</p> <p>Bagheera drew himself out of the tainted water and shook each paw, cat fashion. "Was there no other game?" he asked.</p> <p>Hathi asked: "You killed by choice?"</p> <p>Shere Khan again answered: "It was my right and my night."</p> <p>Hathi replied: "If you have drunk your fill then leave the river and go to your lair, Shere Khan."</p> <p>Hathi's three sons rolled forward a step and Shere Khan slunk away. Mowgli plucked up his courage and asked Hathi: "What is Shere Khan's right?"</p> <p>"It is an old tale and if all the animals will be quiet, I will tell it", said Hathi.</p> <p>Hathi began the story. "In the beginning of the Jungle all animals lived happily together and they all ate leaves, grass, fruit and bark. The First of the Elephants, Tha, the lord of the Jungle, made the earth, the jungle and the rivers and trees. While he was away making new jungles and rivers he made the First of the Tigers master and judge of the Jungle. The First of the Tigers ate fruit and grass with the other animals and he was very beautiful with not a stripe or bar on his hide.</p> <p>Then trouble started. The animals began to argue over the food. One night two buck were quarrelling over the grazing plains and by mistake one of the buck hurt the First of the Tigers with his horns. The First of the Tigers, forgetting that he was master and judge of the Jungle, broke the buck's neck. The First of the Tigers was made silly by the smell of blood and ran away to the marshes of the north and the Jungle was without a judge.</p> <p>Tha came back to see what was going on and none of the animals could tell him who had killed the buck because they were also made silly by the smell of blood.</p> <p>So Tha ordered the trees and creepers to hang low and mark the killer of the buck.</p> <p>The Grey Ape was then made master of the Jungle, but he brought only foolish talk and senseless words to the Jungle. Tha then called all the animals together and said that the First master brought Death, the second brought Shame and now the third will be Fear. Go and look for him. All the animals searched and found Fear in a cave.</p> <p>The First of the Tigers came back from the marshes to kill Fear, but when he tried he found that he was afraid. He went to Tha to try and get his powers back and the stripes off his hide, but Tha said that never again would the Jungle be the same - the other animals would always be afraid of the Tiger. But because the Tiger had been the First Judge he had one right: Man - who was Fear - would be afraid of him.</p> <p>On that one night the First of the Tigers killed a man and so he taught man to kill and ever since that time Man has hunted and killed all animals.</p> <p>The First of the Tigers never would eat leaves and grass again because they had marked him and made him the striped thing he is today, but from that day on, he revenged himself on the buck and the other eaters of grass.</p> <p>It's all about the water .... Once you find it, make sure it's clean enough to drink.</p>
